CaseIH 60 foot (24R30) Front Fold Planters 400 Gallon Hitch Mount Tank Instructions

Planter Manufacturer: **CASE IH**
AGRICULTURE

This tank kit allows a 400 gallon elliptical to be placed on the planter hitch. Use two 420-2020A1 support stand brackets and a standard 400 gallon elliptical cradle. The rear bracket bolts on the hitch in front of the wing fold cylinder mount. The front bracket will sit forward in front of another plate welded to the hitch. The limit on forward movement of the tank is the vacuum fan must fold in front of the tank.

**The 500 gallon tank for this planter has a special rear bracket (421-2059A1) that sits on top of the wing fold cylinder mount. The 400 gallon tank can sit just forward of this location and only requires two identical support stands.
