LiquiShift Multiple Sections Stainless Steel Manifolds Assembly and Mounting

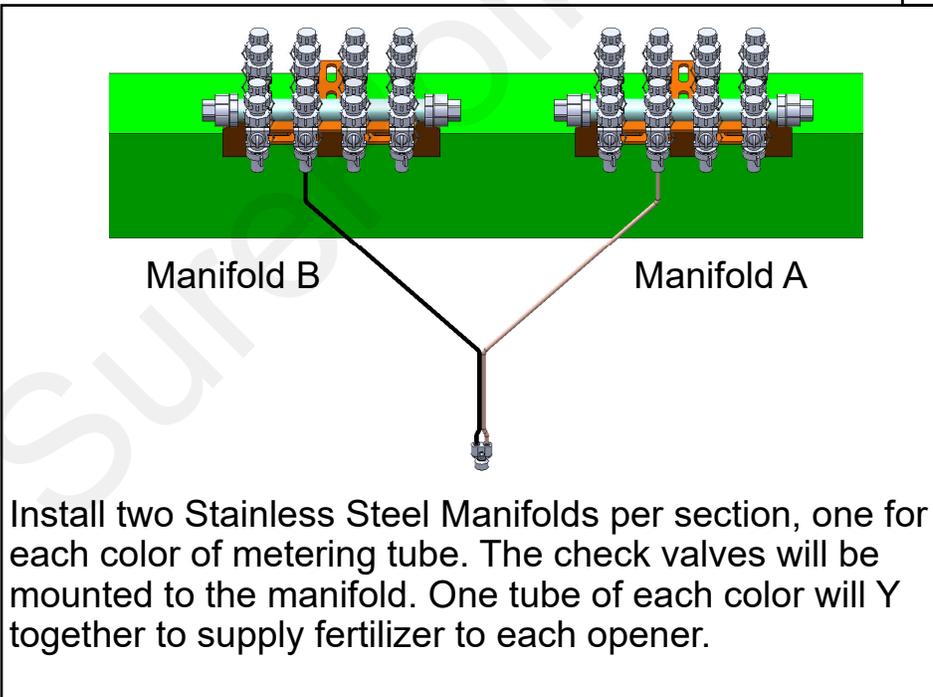

Feed into the section valve stack using 3/4", 1", or 1-1/2" hose from the pump. Each section valve output hose may be split using tees or crosses to feed the necessary number of manifolds per section.

Valve Stack can mount directly to forward/backward frame. Use optional bracket kit 515-105100 to mount valve stack to lateral frame members.

If applying dual products, use bracket 515-105200 to raise the second valve stack above the first to allow visibility of the valves.

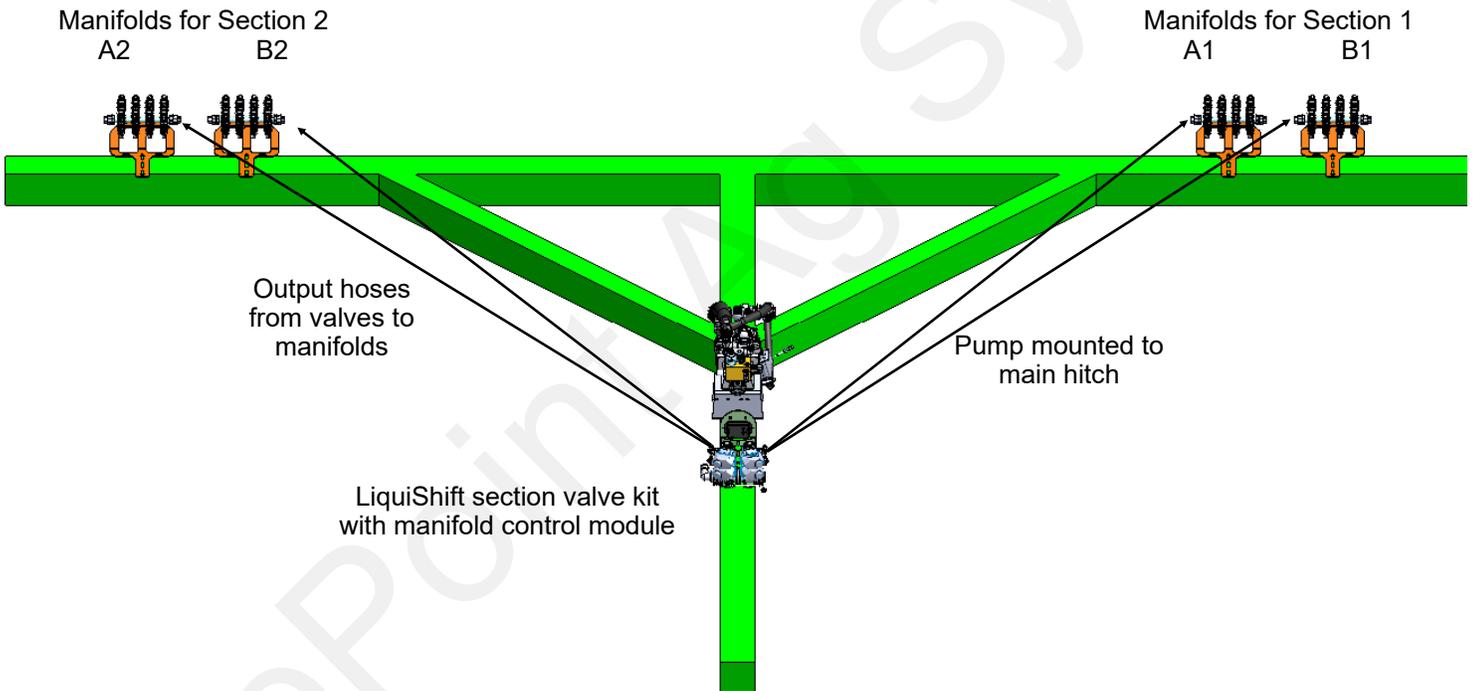

The smaller ID tubing must be connected to the "A" series valves.
