Title: 208-06-5022Y2 Updates

Product Line: FAS

Model: Harnessing

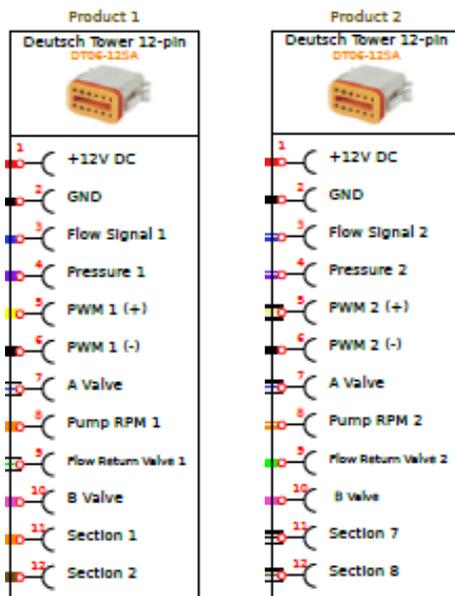

Level: Public

Author(s):Justin Davis

Revision Letter: [Click or tap here to enter text.](#)

**Overview:** A/B valve control for Gen3 LiquiShift is now built into the Product 1 and Product 2 connectors of the 208-06-5022Y2 harness. This harness can now be used for Gen3 LS while using CAN zip valves. It still has the section connectors 1-6, 7-12, and 13-18 for standard section valves for a 2nd product. Another combination could be NH3 with standard section valves on product 1 and Gen3 LS with CAN zip valves on product 2. All kits, quotes, and orders have been updated to the Y2 version of this harness.
