

# SPARTAN™

DIRECT INJECTION

Spartan™ Direct Injection systems provide precise injection of stabilizers, insecticides, fungicides, plant growth regulators, and micronutrients into a carrier flow stream. From 2 oz/min to 80 oz/min, Spartan will reliably deliver exactly the right amount.

## Commonly Used For

- Nutrient stabilizers in NH<sub>3</sub> and liquid fertilizer
- Insecticides, fungicides and plant growth regulators applied in-furrow at planting
- Variable rate application of micronutrients

## 4 Models to Fit Your Application

- 110 – 2-10 oz/min
- 120 – 3-20 oz/min
- 130 – 5-40 oz/min
- 140 – 10-80 oz/min

## Spartan Complete with Tank Skid

- 20 Gallon
- 55 Gallon
- 110 Gallon
- Or Use Your Existing Tank

## Use Your Control Platform

- John Deere Rate Control & RC2000
- Ag Leader – Liquid Product Control
- Trimble – Field IQ
- Case Pro700 – AccuControl
